### How you sign in to Google

Make sure you can always access your Google Account by keeping this information up to date

 2-Step Verification	2-Step Verification is off	>
 Passkeys and security keys	Start using passkeys	>
 Password	Last changed May 19, 2023	>
 Skip password when possible	 On	>

Step 4: in search bar type app Password then it will open this tab. In the Textbox enter mail and click on create then it will generate an secret key.

## ← App passwords

App passwords help you sign into your Google Account on older apps and services that don't support modern security standards.

App passwords are less secure than using up-to-date apps and services that use modern security standards. Before you create an app password, you should check to see if your app needs this in order to sign in.

### Generated app password

#### Your app password for your device

23 4567890123456789

#### How to use it

Go to the settings for your Google Account in the application or device you are trying to set up. Replace your password with the 16-character password shown above.

Just like your normal password, this app password grants complete access to your Google Account. You won't need to remember it, so don't write it down or share it with anyone.
